

MEDICAL PLAN

All events are required to submit a medical plan. The plan should include the event's medical communication plan, number of medical staff onsite, certifications and types of recourses (EMT, Paramedic, Fire Dept. etc), description of how resources will be managed and deployed, and location of medical aid stations. A small event may simply state that traditional "911" protocol will be implemented and there will be no medical personnel onsite. Larger events, or sporting events (run, walk, race) should plan to have medical services onsite or immediately available.

Levels of Coverage

First Aid Kit: A dedicated set of materials and tools for giving emergency treatment to a sick or injured person. The kit should be in a location where it can be easily accessed by event staff.

First Aid Station: A dedicated area staffed with individuals trained in basic first aid.

Certified Basic Life Support (BLS): Individuals that are certified by the State of Colorado as Emergency Medical Technicians that are provided by the event organizer.

Licensed Ambulance Provider: An ambulance provider that is licensed for emergent transport in Teller County by Teller County. Standby ambulances are valuable as an adjunct to on-site medical providers. A dedicated ambulance that is the only medical asset will leave the event without coverage if a patient must be transported.

Fire Department: Cripple Creek Fire Department personnel on-site for the duration of the event, or during potentially high demand time periods.

Use the [Medical Planning Guide](#) to help you complete the plan to be submitted with your Special Event Application.
