How to Change the default Application to Adobe

1. Click on the Start menu and start typing Default apps.
2. Click on that option when it appears in the list.
3. On the right side of the window, scroll until you can see & click on the text link for **Choose default apps by file type**.
4. On the right, locate the hidden scroll bar and scroll down until you see .pdf in the very left column.
5. To the right of .pdf, click on the shown option (probably Edge).
6. From the drop-down list select either Adobe Acrobat Reader DC or Acrobat DC.
7. You can now close the Settings window.
